SUMMER AT THE CINEPLEX

Stephen Whitty offers a tipsheet on what movies to see. In Arts + Escapes

What really happened in six-hour ordeal at Holland Tunnel

One eyewitness, trapped for half of it, recalls four gunshots, slow-speed chase

By Bob Considine
and Stephen Stirling
STAR-LEDGER STAFF

The traffic was typical for a Friday night rush hour into New York City. But Jay Hochberg soon found his heart racing faster than he could ever imagine, while moving slowly inside the Holland Tunnel.

"I heard four gunshots," Hochberg said. "The shooting was probably

hundreds of feet behind me. But the acoustics being what they are in a tunnel, the shots sounded like they came from right behind me. Naturally, this got my attention."

The rearview mirror quickly became Hochberg's window to a surreal, underground world. He could see a white Jeep recklessly weaving through the crawling cars, eventually passing his Toyota. Then he saw the

driver and passenger of the rogue vehicle sprint toward Manhattan on foot. Seconds later, he saw five Port Authority police officers chasing the men.

Ultimately, they would apprehend the driver, Jahaad Sanders, 19, and passenger, Lorenzo Dease, 24, both of Brooklyn, inside the tube, without any more shots being fired, authorities said. Both men were charged with multiple crimes yesterday.

But while the incident played out over just a few bizarre minutes, its impact was great. The Holland Tunnel closed for nearly six hours, snarling traffic inside the underwater crossing and stranding countless travelers in and around Hudson County.

According to Port Authority spokesman Steve Coleman, two police officers attempted to stop the 1994 Jeep Cherokee at about 6 p.m. after it made an illegal lane change beyond the toll plaza on the Jersey City side. At one

point, Coleman said, one officer "felt threatened" as the driver allegedly attempted to use his car as a weapon. The vehicle dragged one officer about 15 feet as it made for the tunnel.

Police fired four shots, with one bullet striking Sanders in the forearm. Photographs provided by Hochberg show the back window of the Jeep was shot through.

Hochberg, a former Hackensack resident and current New Yorker, was

Christie courting wrong side of history

What if Richard Nixon had refused to give up the Watergate tapes when the U.S. Supreme Court demanded them?

What if Al Gore had rejected the decision granting the presidency to George W. Bush, and instead called on his followers to storm the White House?

It's hard to imagine because it is an article of faith in America that the courts have the final word. Judges are the referees of democracy. Without them, we face chaos, raw power struggles and the loss of basic constitutional rights.

That's what we're taught as kids, and that's what America is preaching in places like Afghanistan and Iraq, where democracies are under construction.

But in New Jersey, not so much.

Gov. Chris Christie is threatening to defy the state Supreme Court if it requires him to spend more money on public schools.

"Be paying attention," he says, "because this is going to be a very important moment in the history of our state."

Important is one word to describe it. Appalling is another. Because if this is more than a bluff, we are entering a strange new zone. This is a power grab like no other in New Jersey history.

"It's a big deal," says professor Robert Williams of Rutgers School of Law in Camden. "It would really be a constitutional crisis. What the governor is suggesting is to defy the basic structure of our government. It's pretty extraordinary."

You have to wonder how far this governor would go. Once he crosses this line, would he also defy rulings on housing, or the environment, or

TIM FARRELL/THE STAR-LEDGER

Marlene Witter of Newark has dinner with her children, from left, Ronald, 19, Arrianah, 10 months, and Aminah, 11, along with family friend Latasha Davis. Witter is one of 17,775 full-time state employees making less than \$45,000 a year.

THE BOTTOM LINE ON STATE PAY

Analysis: Some public workers well-paid, some well below middle class

By Ginger Gibson
STAR-LEDGER STAFF

With her family seated around a small kitchen table in her Newark apartment, Marlene Witter scoops chunks of salmon baked with cabbage and carrots out of a plastic bowl she uses as a serving dish for the dinner she whipped up for her four children after getting home from work.

As everyone — including the youngest, 10-month-old Arrianah — holds hands, Aminah, 11, says the prayer: "Thank you God for the food you have gave and the clothes on our backs. Amen."

Witter, 39, a single mother, works as a nurse's assistant at Greystone Park Psychiatric Hospital. In addition to paying for day care and rent, she's helping her son Ronald, 19, attend culinary school, and daughter Felicia, 21, pursue a nursing degree.

A full-time state worker, Witter does it on a \$43,578.41 a year

salary. She is one of 17,775 full-time state employees making less than \$45,000 a year, according to a Star-Ledger analysis of the 2010 state payroll.

"I would love for (Gov. Chris Christie) to live off that salary," said Witter. "The working families are the ones who are losing."

Christie has made state employee pay and benefits one of Trenton's hottest topics as the contracts for 50,000 unionized workers are set to expire in June. Saying the state can't afford the cost anymore, the governor wants state employees to kick in more for their health insurance and pensions and says those in contract talks shouldn't get any pay hikes. He sometimes calls their unions greedy.

But while politicians debating the issue use broad strokes and general terms in describing the state worker, The Star-Ledger analysis reveals a diverse work force that includes a wide range of

GARDEN STATE PAY SCALE BY THE NUMBERS

The state's payroll is varied and includes employees ranging from cafeteria workers and doctors.

Sources: 2010 N.J. Treasury payroll data; U.S. Department of Labor; U.S. Census Bureau

jobs, levels of education — and compensation.

The analysis shows the median state worker salary — the point where half make more and half make less — was \$62,267 last year for the 83,542 union and non-union employees in the three branches of state

government.

On its face, that would mean a "typical" state worker is paid less in New Jersey than the median salary for a municipal police officer, who makes \$90,672, but more than the median salary for a teacher, who makes
